### Appendix 8 -- Art Songs by African American Composers in

#### Musical Anthologies

By Randye Jones and Emery Stephens

*The hallmark of African–American art songs is that they serve as soulful expressions of the experiences of the people. Projected through many of these musical expressions are important narratives on the emotional, cultural, and spiritual history of African Americans. Though these art songs are used most often as a means of artistic/aesthetic vocal expression, their lyrics and musical structure contain much valuable and useful information on the cultural and historical circumstances and the development of African Americans as a people in this land. Given the variety of musical genres from which they borrow—jazz, blues, ragtime, as well as spirituals—they illuminate the evolution of a people’s music. Herein lies the greatest potential for art songs to be used as teaching and learning tools. As such, they are woefully underutilized. It is clear that, given the sociological and academic difficulties of the times, we can ill afford to ignore any mechanisms that offer the potential to make valuable contributions to a more complete understanding of ourselves as Americans and of American history. African–American art songs represent an important contribution to that process—not only for the group from which they originate but also for all Americans.<sup>1</sup>*

Below is a selected list of musical score compilations containing art songs by African American composers. Only the relevant song(s) contained in the compilations are listed--with composer and accompanying recording note where applicable. Negro spirituals are listed in [Appendix 3 - Spirituals in Musical Anthologies](#).
